
BIODYNAMIC[®] SOURCE

BD 500 XP - Cow Horn Manure

Product Information & Use Notes

What it is

A cow horn manure preparation pre-potentized with the BD 502-507 compost preparations. Used as a foundational soil spray for soil life, root development, and fertility.

When to use

- Preparing soil, beds, fields, orchards, gardens, or land being converted to biodynamic or organic management.
- Soil or plants under stress from drought, excess rain, or weak root development.
- As a broad soil inoculant or compost tea inoculant.

How to use

Dilute in clean water, stir rhythmically, and apply as a soil or foliar spray. Best stirred and applied in late afternoon or early evening.

Rates and timing

Use about 2 oz. per acre in 3+ gallons of clean water. Stir for 20 minutes, switching directions to create and break the vortex. Ideally apply at least 4 times per year.

Storage

Store in a cool dark place, away from electricity or harmful fumes.

Keep preparations sealed and protected until use. When in doubt, contact Biodynamic Source for crop, acreage, and timing guidance.
