BD 502-507 - Compost Prep Kit

Product Information & Use Notes

What it is

A complete compost preparation set: Yarrow, Chamomile, Nettle, Oak, Dandelion, and Valerian.

When to use

- When making or treating a compost pile.
- When you want the full compost-prep set rather than a single field spray.
- To support compost biology, nitrogen retention, and balance in the heap.

How to use

Make 6 holes evenly distributed across the compost pile, deep enough to place the preparations about halfway down. Place each dry preparation in its own hole, then cover the holes.

Valerian step

Empty the BD 507 Valerian liquid into 1 gallon of warmed fresh water. Stir vigorously, reversing directions to create and break the vortex, for 10 to 20 minutes. Pour half into the sixth hole and mist the remaining half over the whole heap.

Storage

Store the kit in a cool, dark place away from electricity or harmful fumes.

Keep preparations sealed and protected until use. When in doubt, contact Biodynamic Source for crop, acreage, and timing guidance.
