Winter Horn Clay

Product Information & Use Notes

What it is

A horn clay preparation used to support fungal mycorrhizae and mineral availability for plant uptake.

When to use

- Commonly used with BD 500 XP.
- Useful when the goal is soil life, roots, minerals, and below-ground activity.
- Best treated as a specialty preparation chosen for a specific soil-building strategy.

Use guidance

For this specialty preparation, contact Biodynamic Source for rate, water amount, and timing before use.

Storage

Store sealed in a cool, protected place away from electric or harmful fumes.

Keep preparations sealed and protected until use. When in doubt, contact Biodynamic Source for crop, acreage, and timing guidance.
